

# K-3000L

Water based cleaner

Introduction  
K3000L water based cleaning machine can finish chemical cleaning, rinsing and drying section automatically in cleaning chamber. It's a reliable and efficiency select for stencil/PCBA cleaning.

Application

SMT/SDF stencil

Mask

SMT scraper

Maskprint/big size PCBA

## K-3000L 详情介绍

Water based cleaner Details Introduction

The machine is used for SMT stencil/PCBA cleaning with water-based liquid in electronics industry. With the most advanced technology, it will achieve 100% clean and environment protection.

The machine consists of cleaning system, rinsing system, drying system and filter system. It uses electric and compressed air as power. It's very convenient to operate and ensure cleaning effect, as well as improve the production efficient. The cleaning liquid is cyclic utilization inside the machine, and it will reduce consumption and cost. Also, the work time will reduce, and prevent the damage to people because of workers don't need to touch liquid.

## K-3000L 技术参数

Water based cleaner Technical Parameters

Max size	800mm(L) x 750mm(W) x 40mm(H)
Cleaning liquid tank	50L
Best liquid usage	40L
Cleaning model	High pressure liquid spray up-down
Drying model	High pressure hot air dry
Clean liquid recover filter	1um
Liquid heated temprature	Room-70°C
Noise	Less than 50 Db
Resistivity monitor range	0-18.2MΩ.cm
DI water supply	15-50L/min
DI water pressure	≤0.4Mpa
DI water connection pipe	3/4 Inch
Air supply	4.5kg/cm <sup>2</sup> -7 kg/cm <sup>2</sup>
Power supply	AC380V 50HZ 60A
Net weight	500Kg
Air outlet size	Φ124(W) x 30mm(H)
Machine size	1610mm(L) x 1200mm(W) x 1850mm(H)
